

Martin E. Mendez

New York, NY | US Permanent Resident | (347) 876-6500 | info@mart-in.us | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-Stack Engineer & Former Entrepreneur with 4+ years of experience. Specialized in **AI Agents (LangGraph)**, **RAG architectures**, and scalable web systems. Expert at bridging business logic with high-performance technical execution. **Ready for On-site roles in NYC.**

SKILLS

- **AI & Data:** LangGraph, LangChain, OpenAI/Anthropic APIs, RAG, Vector DBs (Pinecone), Python (FastAPI)
- **Full-Stack:** Node.js (Express), TypeScript, Angular, React, Vue.js, RxJS, Tailwind CSS, PostgreSQL, Redis
- **Infrastructure:** Docker, CI/CD (GitHub Actions), Firebase, Stripe API, OAuth 2.0/JWT

FEATURED AI PROJECTS

TalentGraph | AI-Driven Recruitment Engine | LangGraph, FastAPI, Angular 19 | [GitHub](#)

- Architected a multi-agent system with **12+ specialized nodes**, featuring **PostgreSQL checkpointing** for persistent conversation states and complex HR workflows
- Reduced trigger latency to **<5ms** via **GPT-4o + Claude Haiku** orchestration and hierarchical routing
- Implemented **SSE streaming** for real-time candidate screening and automated interview question generation

AI Trainer-Teacher | Context-Aware Educational RAG | LangChain, FastAPI, Pinecone | [Live Demo](#)

- Engineered a **hierarchical RAG pipeline** with dynamic page filtering, cutting irrelevant context by **70%**
- Developed history-aware question reformulation and **Redis-backed state persistence** for multi-turn chat
- Integrated an adaptive exam system with real-time Firestore auto-save and anti-cheat shuffling logic

EXPERIENCE

Software Engineer | Tupungato Wine Co. | Napa, California | May 2024 – Present

- **Architected** a full-stack B2B platform with Node.js/Express backend, Angular frontend, and Firestore, serving premium wine clientele with member portal and admin dashboard
- **Integrated** Stripe API for payment processing, subscription management, and customer billing workflows
- **Optimized** database schemas for customer segmentation and deployed backend via automated CI/CD

Software Engineer | AgroFull | Buenos Aires, Argentina | Mar 2022 – Mar 2024

- **Led** the B2B platform migration to Vue.js using a mobile-first responsive architecture
- **Bridged** stakeholders and dev teams as Technical Lead for feature definitions
- **Created** Figma prototypes to streamline communication and resolve technical gaps

Software Engineer | Victor Iermito Luthier | Paris, France | Apr 2021 – Dec 2021

- **Developed** a custom full-stack product catalog using Angular and Firebase with a real-time CRUD interface
- **Engineered** offline-first capabilities via data caching for 100% presentation uptime

Founder & CEO | Drinkko (SaaS Marketplace) | Paris / Buenos Aires | Jul 2017 – Mar 2021

- **Launched** a "yield management" platform for the hospitality industry, managing 50+ venues
- **Designed** a high-frequency notification system using ****time-slot logic**** to drive real-time traffic to bars
- **Managed** the full product lifecycle and a cross-functional team, scaling the MVP to market launch
